Issued (electronic this year Burn)!

2021.04.15 | Serialization

Hello everyone. I'm Tomoyoshi Sato from the Corporate Quality Assurance Department. 2021

At the start of, my thoughts on the quality goals we should aim for

I would like to talk.

In 2020, quality has improved steadily. 3MIS (within 3 months from vehicle sales)

Rate) and delivery complaints maintain a high quality level. Also, near

Good quality is ensured even for the products released to the world in the new year, and it is considered.

Thank you for your efforts so far.

INFORMATION

People due to the new coronavirus infection (COVID-19) that is widespread all over the world
Has become difficult to contact and can no longer travel abroad. like this

Under the circumstances, the next medium-sized CVT will be mass-produced and shipped all over the world. Individual technical experts are present

In a situation where we couldn't stand, Chinese and Mexican colleagues made full use of remote tools,

They are preparing to launch. Including Japan, which has already been launched

Therefore, the quality of this next medium-sized CVT will be an important key in 2021.

Also, in Thailand, the electric unit motor and gear box that should bear our future will be launched.

Will be welcomed. Unlike CVT, in preparation for production of products that JATCO has never experienced before

Su. In a remote environment where Thai friends are not accustomed to unfamiliar equipment due to corona sickness

Are preparing to launch. These electric unit products are also in the future

It is a product that must be released to the world with high quality.

The Corporate Quality Assurance Department has set a new goal of double-digit quality from last year.

Ta. Is this goal a desire to raise the quality level to the next level, not to mention double digits?

These are the ones listed above. CVT / AT and new electric unit products have even higher gears

Let's proceed with preparations to bring it to the world with high quality.

At the same time, I keep saying that it is necessary to manage both arms in order to realize them.

did. I'm not thinking about that difficult thing. 100 in the automobile industry

Deepening and exploration are needed to create a new format during the annual transformation period

That is. The source of current competitiveness ... In other words, understanding CVT / AT more and more deeply

Pursue action and new competitiveness ... In other words, looking for competitiveness in electrification.

This is what we have to do now.

The year 2021 is a year in which the true value of the management of both arms is questioned. The thoughts put into double-digit quality

Understand and everyone at One JATCO, "Deepening CVT / AT" and "Exploring electrification"

Let's aim for the success of the next medium-sized CVT and electric unit products!

The quality theme for 2021 is

Road to ZERO ~ The power of quality that connects to a new era! ~

I decided to.

Let's raise the gear one step further for the new era

U!
