Let's think about SDGs together!

Explanation of games and goals 14 that SDGs can learn

What I think after continuing this series is, "Keeping the will to work on the SDGs individually.

It's hard. " If you work at the company, regional or national level, your eyes

There are things that support you, such as the standard price and the existence of friends, but at the individual level

It is quite difficult to continue to be interested and practice. Here with the help of the game

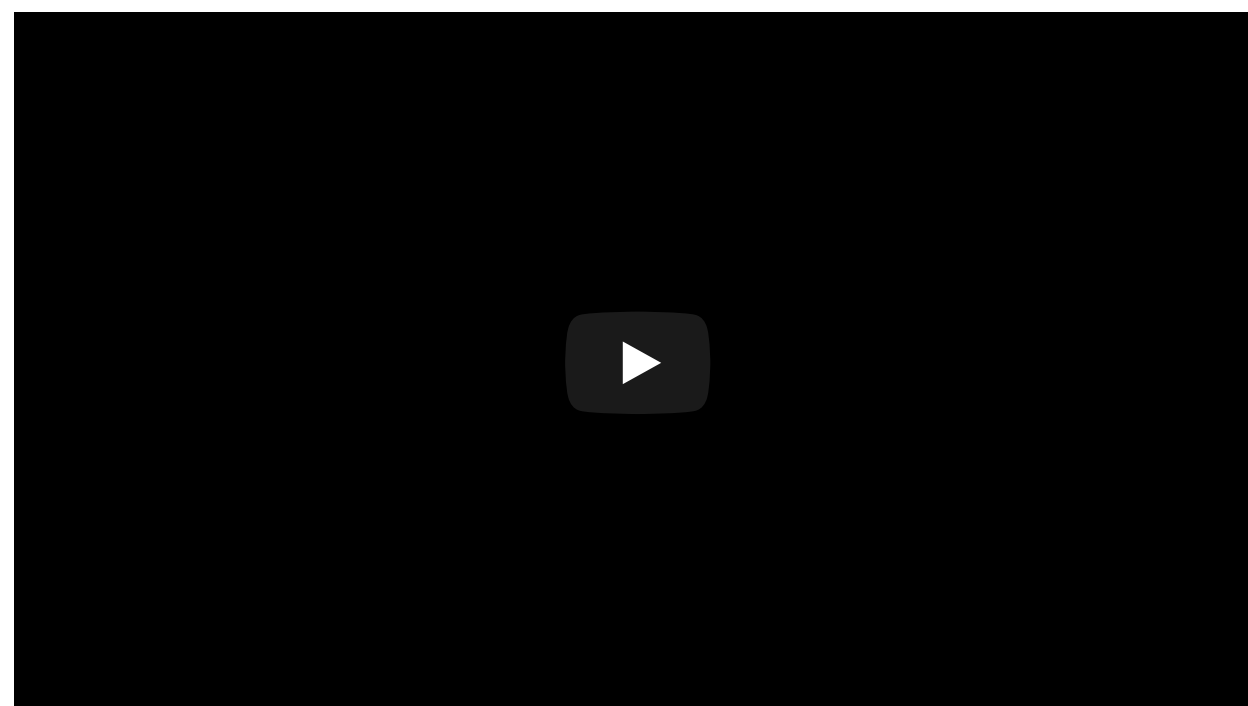

Would you like to go one step further?

Card game "2030 SDGs"

This "2030" always comes out when you look up games related to SDGs in the world.

SDGs ". The game was developed in 2016, but it is still covered and introduced by the media.

It has been.

Games where SDGs can be learned
Explanation of Mu and Goal 14

2022.03.03 | Serialization

INFORMATION INFORMATION

Jatco

The game is funded and timed by multiple teams to achieve the goals given to them. By spending time completing project activities and gaining new funding and time It's about working on new projects one after another. The goal is "great "Getting wealth" "In search of a comfortable life" "Activity as an environmental protection warrior" It is realistic and interesting that there is a "leap" and so on, and it is not just about environmental protection. And there are "economy", "environment", and "society" as common indicators for all participants. These indicators will change depending on the results of the project of the team, and the activities of each team A different 2030 society will be formed depending on the situation.

"Why SDGs are needed in our world", and "By having it You can experience what kind of changes and possibilities there are. Participants said, "At first, I tended to focus on my goals and goals, but I achieved them. It turns out that it is very important to collaborate with other people in order to do so. "It wasn't just the economy as the world changed. I knew it, but it was reproduced in the game, and I noticed various things. There was, "and so on.

However, this game is not for sale. Game time averages 3.5 hours, minimum 2 It's time, and events by certified facilitators are still being held in various places. Participate in an event or a company asks a certified facilitator to hold an in-house event It will be necessary to do things. Still, there is no end to the number of applicants Because there is no lie in the developer's words, "I can understand the essence of SDGs while having fun." prize.

Game introduction site

JATCO will also introduce this game to training in order to understand the significance of the SDGs. May come.

SDGs Environmental Sugoroku "Environmental Squadron Sugoroku"

_"

Sugoroku "Environmental Squadron Sustainer" that can be played by elementary school students. Moreover, there is no download

It is a fee. Try making sugoroku and read the story while advancing the mass from the start Saw. I thought it was a children's game, but this is pretty good. Each i It's okay to talk about protecting the planet with your family at Bent, or simply do it without thinking. You can play as a kid. At the end, the environmental destruction monster Ondan Khan always comes out. I will think about the reason.

Download site

Children are learning SDGs on a regular basis. Maybe I was in the game
 You may have the experience of being taught by a child. It's very happy
 It's a new thing, isn't it?

Goal 14 Let's protect the richness of the sea

Protect the resources of the sea and use them carefully

Goal 14 is "Let's protect the richness of the sea".

There is no doubt that we benefit a lot from the sea. Food and

Providing natural resources such as pharmaceutical materials, decomposition of pollutants and waste, damage from storms

It supports our lives by reducing the number of people.

A large amount of garbage such as plastic has flowed into the sea, threatening the maintenance of the ecosystem.

vinegar. Fish and seabirds eat finely crushed plastic, leading to death.

I think everyone knows that this is happening.

In addition, the temperature of seawater rises due to global warming, corals die and CO2 in the sea is absorbed.

There are effects such as being unable to be collected and the death of marine life protected by corals.

I am. It is said that when corals die, half of the marine life will die.

Another major problem is the reduction of fish stocks due to overfishing. Global health boom and fishing

Due to technological advances, we continue to catch too many fish. Eels and saury

It is a very familiar example that we are no longer on our table.

What we can do is to separate and reduce waste and reduce daily energy consumption to reduce CO2.

The basic thing is reduction. In addition, "MSC approval" called "eco-label of the sea"

You can also select products that have acquired the "certificate mark". It is distributed to fishery resources and the environment

It will be a marine product caught in a careful fishing industry.

At JATCO, the quality of wastewater is controlled to strict standards at all production bases, and the sea is also used.

We carry out volunteer activities such as cleaning the shore. Also, carbon neutral

Activities for Le are helping to curb global warming and protect the abundance of the sea.

increase.

In our daily lives, we do not look at the marine environment. deer

However, considering the current situation that is affecting changes in food and landscape, it is necessary to take immediate action.

I think it is important. We are also more conscious of "protecting the richness of the sea"

Today.
