SDGs

# Let's think about SDGs together! What will happen from now on "Jatco's SDGs "!

We started a series on SDGs in August last year, and so far various things about SDGs.

I have told you about "the relationship between JATCO and 17 goals" along with various topics. this time

Is Masako Fujita of the Global Public Relations Department, who is in charge of coordinating sustainability strategies.

In addition, I will talk from the perspective of what the SDGs in JATCO will be in the future.

I asked.

## Each person has their own sustainability Ru

Now, I am preparing to propose JATCO's sustainability strategy.

It's a little different from the concrete business strategy, and there are various sustainability issues.

There is a way to think about it. I talked to EC members individually, but that

I think each of them is interested in various points of view. How these look

Do you want to make it into a shape? I am worried every day.

INFORMATION INFORMATION

**Jatco**

**f Jatco**  
The mission is passion.

## JATCO has been working on SDGs so far Was

I do not see the SDGs as a new and special activity. "One of the world

One person thinks about the earth on which they live and continues to create a better world.

The SDGs are a summary of what you need to do and what you have done so far.

I think so. As a manufacturing company, JATCO saves energy and wastes.

We have been working diligently for a long time to reduce the amount of exhaust gas and clean exhaust.

rice field. Is it possible to develop products with less environmental impact, to take advantage of diversity, and to comply with laws and regulations?

I am going. There are many other things, but JATCO is newly working on the SDGs.

Rather than mu, what we have done so far, what we are doing now, and the connection between the SDGs

Think again, and think about what is deeper and what is lacking

I think that such an approach would be good.

Each employee should be aware of social issues that should be addressed for a better society.

If we can work on each of these jobs, what is JATCO's SDGs?

Isn't it accelerating steadily? No one is not interested in environmental issues

It's Zu. Each of the 14,000 global employees is interested in and aware of the SDGs

I believe that being able to do so is the key to promoting SDGs at JATCO.

## Think for a moment when shopping

To be honest, it was at work that I became aware of the term SDGs.

After getting involved. Shake your life as you understand the SDGs

I often come back. Now I'm careful not to throw away things and food

increase.

For example, when I found clothes and things that suit my taste, I used to say, "I bought this for me. I often buy it at first sight without thinking, "It's there to get rid of it."  
rice field. Recently, I'm thinking, "In what kind of situation is this used? Is there an opportunity to use it?"  
It became a sea urchin. If you don't have much chance to wear it, I feel sorry for the clothes you bought.  
Also, when it comes to food, I always think "what's in my house?" And buy it.  
However, I try to use up everything in the refrigerator as much as possible. as a result,  
Household waste has definitely decreased.

I wear the SDGs badge as much as possible every day, but once a day I wear the badge  
You can be aware of the SDGs again. Consciousness to enter from the shape  
It may be useful for changing.

## Our actions will change the future

Again, the SDGs are not special, they are more familiar.  
I want you to And not only some people, but all employees, one  
Each person acts by applying it to himself / herself. I hope I can bring it to that state  
I think. To that end, how do we convey the SDGs to our employees?  
Should I do it? I'm thinking about it now.  
With the SDGs, each and every one of us feels positive and says, "Our actions will change the future.  
Aiming for communication that will trigger that  
To go.

## Goal 16 Peace and justice for all

Peaceful and accepted by everyone

Let's create a society where everyone is protected by law and system

Goal 16 is "Peace and justice for all."

May 2022. As I write this article, this goal is sadly very timely

-It's a story. Who is doing what is happening in Ukraine against this goal 16.

There is no clue to the solution though it is obvious to the eyes.

According to a UNICEF survey in April 2021, people lived in conflict-affected countries and regions.

The number of children is about 246 million. Only children.

The number of refugees in the world is 79.5 million. 1% of the world's population, 1 in 100 people leave home

I am in a situation where I have to live in another place.

In the world, one in four children under the age of five is not registered for birth. birth

Being "birth registration" is a right recognized in the world as a human right for children.

It is profit. By being registered, you have various rights, and you want to grow healthy and happy.

You can receive the service of.

In addition to this, there is peace around the world, such as corruption, bribery, arms trading, and organized crime.

There are many challenges that cannot be kept fair.

Here are some things we can do:

- Interested in international conflict issues, etc.
- Try participating in related events and donations
- Actively participate in politics, such as going to elections

First of all, what we are interested in and know, and how many people participate in politics.

Recognize that, however, will lead to the realization of peace and justice.

At JATCO, all departments and departments comply with laws and regulations, strengthen compliance, and make public.

We encourage positive transactions and open information disclosure. As a good corporate citizen

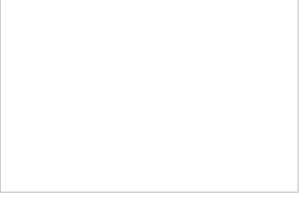

And as a fair company that can continue to carry out corporate activities for many years to come. Jatco is everything

We will continue to be a company trusted by our stakeholders.
